## Schools Re-Opened on Wednesday

Streets Lively With Children on Way to School After Two Months Free and Easy Holidays

Boys and Girls, about 650 of them, including a number of younger children being enrolled for the first time, were out on time for the 9 o'clock bell on Wednesday morning.

The streets in the vicinity of the schools were more lively at this hour in the mornings than for two months past, and parents now have to bestir themselves a little earlier in the morning to get the youngsters ready for school.

Some have been transferred from West Coleman to Central school, not altogether to the liking of the children in some cases, who wanted to remain with their old playmates.

A staff of 19 will be employed, five being in the high school, and 14 in the public schools.

New paint and bright class rooms welcomed the children back to their studies, as well as teachers who during their long midsummer holidays have been acquiring additional knowledge by attending summer schools or spending the time in educational trips to various places in Canada.

The first day is mainly spent in organizing classes, so that after answering the roll call in the morning, most of the pupils are free for the day or busily engaged in securing their necessary books. From now on the familiar sound of the school bell will be heard after its two months rest.

### All In A Rush

President Beatty's special train whizzed through Coleman on Saturday afternoon going westward. The only stop between Lethbridge and Crow's Nest was when the train caught up to some cattle, stated Agent Totten, as he handed out a couple of cigars. Quite a party of directors and officials were on the train of eight or nine coaches. He is on his annual tour of inspection of western lines.

of 1000 thrills

## Lethbridge Tennis Players Here in Inter-Club Matches

Ten players from Lethbridge city tennis club matched strokes with local players here on Sunday under ideal weather conditions. Good playing was witnessed and many matches went three sets before decisions were reached. Of the 21 matches played Coleman won 15 and Lethbridge won 6.

Lethbridge players were the Misses Edna and Jean Scott and Jean Gibson, and Messrs. H. S. White, Max Hoffman, John Jackson, Haines Felger, Homer Ellis, Bud Kearns and Howard Kessler.

Coleman players will return the visit next Sunday, when it is likely two or three cars will take them down.

### School of Cooking Well Attended

When the ladies of the United church start on a project, they usually do the job right. A school of cooking was held last Thursday and Friday, and in addition to an advertisement in The Journal, the ladies hustled and sold tickets in advance. On Thursday there were 79 present and on Friday 85. The school is conducted by Miss Dickson-Riley and Miss Alderson of Winnipeg, and they demonstrate with certain nationally advertised goods and give interesting talks with their instructive lessons.

The Ladies Aid were very well pleased with the response, and the serving of tea each afternoon gave a social air to the occasion, adding to the interest.

### Catches Fish; Does Not Use Hook

Half an hour's wrestling in a shallow pool with a bull trout weighing three pounds is an unusual and undignified way to catch a fish, but Jerry Lonsbury tells the tale, a fish story which is true. The Rod and Gun Club held their competition at Waterton on Sunday. Catches were poor and some gave up in disgust. Jerry spied a pool and having an uncanny eye for detecting fish, he caught the glint of a trout in the pool, which could not escape. Though it might seem easy to catch a fish in such a cramped space (for the fish) it took half an hour. That pool seemed as big as a swimming tank when trying to catch the agile and elusive fish, but finally, by fair means or foul, (mostly foul) Jerry kicked it in the snout and dragged it out by the tail.

### Penalty Under Motor Vehicles Act

New provisions of the Motor Vehicles Act are being rigidly enforced. A local business house engaged a temporary truck driver for two weeks, and though he had a driver's license, he did not have a chauffeur's license as required by the Act. Prosecution by the R.C.M.P. resulted in a fine of \$20 against the chauffeur and \$5.00 and costs against his employer, who protested that he did not think it right that he should be fined for such an offence. Magistrate Gresham having no option in the matter, the fines were paid.

### Hospital Notes

Mrs. Stevulak, jr., who was in hospital, was discharged on Monday.

Nick Capuk, who three weeks ago received a nasty head wound from falling coal, is making progress.

John Matkovic of West Coleman is in hospital for examination.

Jack Nash is making steady progress following an appendix operation.

## Applications for Naturalization

Advised to Become Better Acquainted With English Language and to Study History of Canada.

Six applications were heard by His Honor Judge A. McDonald here on Wednesday morning. Four were granted, one was deferred till the applicant's wife and family arrive from Europe, and another not granted owing to the applicant's wife and son living in Europe, and no provision having yet been made for their coming to Canada. In this latter case the judge stated it was not the policy of the State to grant naturalization when the husband lived in Canada and his family in another country.

He asked the applicants if they read English newspapers, and in some cases they did. One applicant stated he read among other papers the Lethbridge Herald and the Coleman Journal. Another said he read the Winnipeg Free Press. They were all advised to become better acquainted with the laws and history of Canada, and to develop a spirit of true citizenship; not simply for their own selfish purposes, but in order that they might contribute to the upbuilding of the country in which they would, as citizens, enjoy the same privileges as those born here.

"In becoming citizens of Canada, do not expect the government to do for you what you should do for yourselves," stated Judge McDonald. "A country cannot be better than its citizens, and a good citizen will act for the good of the whole and not solely for his selfish interests. Only by keeping these ideals foremost can we build up a country of which we may be proud."

Applicants appearing were: Vincent Smolik, Josef Lepacek, John Sogan, John Nikituk, A. Glowacz and Alois Kaiovoda. The countries of birth of the applicants were, two from Russia, two from Poland, and two from Czechoslovakia.

## Pete Smith Injured

About 1 a.m. this morning while on his regular inspection rounds in McGillivray mine, Peter Smith, fire boss, was injured by a fall of rock, receiving a gash in the head, besides three small bones in one foot were broken. Had the full weight of the rock fall caught him, his injuries might have proved fatal. He managed with great difficulty to stagger to the mine head, a considerable distance, and he was assisted by Max Hall. He was speedily conveyed to hospital where he is at present comfortably resting.

### Salvation Army Notes

Welcome services will be held on Sunday for Lieutenant Frayn, who comes from Camrose to take Lieutenant Pierce's place, who has been transferred to Wetaskiwin.

The annual picnic was held at Crows Nest Lake on Wednesday of last week and a very enjoyable time was spent.

A shower in honor of Mrs. A. Thorneby was held by the Ladies Home League. A delightful evening was spent and the guest of honor was the recipient of many lovely gifts.

In the quiet of the home, The Journal is read and advertising announcements as well as the news are impressed on the readers' consciousness, creating the desire to purchase.

## \$5,000 A Year In Alberta Credit

"It may be possible to give \$5,000 credit a year to every family" on the present basis of living," Hans E. Wight, M.L.A. for Lethbridge stated in a public meeting last Thursday evening. To which might be added, it is possible to give them \$10,000 or \$20,000, or even the sky might be the limit. It depends on what value Alberta Credit will have. Germany printed millions and millions of marks to increase purchasing power, but the more they printed the higher prices soared. A sense of proportion must be observed in all schemes to increase purchasing power. Money during war days, when it was plentiful, did not possess as much purchasing power as it does today, when money is scarcer and prices are lower.

## Saw the Lord Mayor of London—

But Not His Famous "Show"

While holidaying in Vancouver, Mr. and Mrs. J. Emmerson had a close-up view of Sir Percy Vincent, Lord Mayor of London, who was visiting Vancouver as the guest of the city in honor of the Jubilee celebrations. His footmen, in powdered wigs, and the symbolic mace, besides other trappings of his distinguished office, were brought along to impress cosmopolitan Vancouver, and a guard of honor of the R.C.M.P. and sailors from H.C.M.S. "Skeena" were lined up at the Vancouver hotel, where Mr. and Mrs. Emmerson were among the joyous welcoming throng.

### Defied

A boy in school had become confused with his studies, so he sought his father one night after dinner and asked him, "Dad, what is bankruptcy?"

The father had had a long business career, hence the question was an easy one. He replied to his son's question, "Bankruptcy is when a man puts his money into his trousers pocket—and lets his creditors take his coat."

## Nothing But A Rumor

A RUMOR went the rounds for a short time last week to the effect that because a certain store-keeper had stated that Prosperity Certificates might go below par, the executive of the local Social Credit committee had written to Premier Aberhart suggesting that his trading licence be withdrawn.

The Journal, immediately the rumor was heard, interviewed Albert E. Knowles, local president of the Social Crediters, and he stated there was no truth in the rumor. He intimated that possibly it was originated by someone antagonistic to the Social Credit party.

## Fire Fighters Still on Job

Not Safe to Discharge Crews Till Danger Period is Over—Men Now on Construction Work

Over 100 men are still at the fire camps, building roads, reconstructing telephone lines and putting in bridges where needed, work which should have been done years ago, stated Ranger Harry Boulton, who is still maintaining headquarters and main camp at Lynx Creek, 18 miles south of Coleman.

There is still fire in many places, which requires constant patrol in case of high winds causing further outbreaks. Crews are well organized and are working faithfully at the various tasks allotted them.

Though considerable rain has fallen in the Pass, surprisingly little has fallen in the actual fire area. Minor injuries have been sustained by some men, but no serious accidents. It depends on weather conditions just how long the fire camps will be maintained.

## What About The Pass Highway?

This District Given The Go-By While Less-Travelled Sections Given Appropriations.

"Mr. Fallow said that this fall it was planned to do some graveling on the highway between Waterton and Pincher Creek. Initial stretches to be hard-surfaced would be between Waterton and Macleod."

Allowing that tourist traffic is worth catering to, isn't it a fact that the section of highway between the Pass towns, which is far more used the year round, deserves consideration? Business comes first, and this stretch of highway and the heavy contribution by Pass residents paid towards it entitles it to consideration above any other piece of highway in southern Alberta.

This should be constantly hammered home to the highways department. The wheel that squeaks the loudest usually gets the most grease. This end of Rocky Mountain has become too docile. It's time more political influence was used to get what is coming to this end of the Pass.

### Coleman Homing Society

Result of race from Creston, B. C., on Aug. 22, was as follows: 1st. C. Makin, 2nd. F. Eyzackers, 3rd. F. Beddington, 4th. A. Beigan, 5th. W. Roughhead, 6th. J. Hurkot.

Prizes were donated by Mr. C. McKinnon, Mr. J. S. D'Appolonia and Mr. J. Lysek.

Next race will be from Nelson, B. C., on Aug. 29.

Don't envy the man ahead of you. Get up and you may get on. Good judgments based upon precedent whether definite incidents are remembered or not.

Journal ads. are business-getters.

## The Search For Economic Safety

One frequently hears it said nowadays that the subject of economics should find a place, and an important place, on the curriculum of the public and high schools.

The proposal has arisen, no doubt, out of the depression from which the countries of the world have been suffering and their populations groping, more or less in the dark, in the hope of finding a way out of the financial and economic difficulties which are besetting them and from which apparently a slow, but it is to be hoped a sure, emergence is in progress.

It is urged that matters pertaining to currency and credit are complicated and that the average person arrives at the so-called age of maturity and discretion with very little knowledge to guide him on topics which, after all, are of great importance to everyone. Even the fundamental principles are obscure to the average man, and this applies not only to the farmer on the land and the merchant in the country store, but to the average business man in the larger centres.

It is pointed out that after all it is the average elector who must decide what course in regard to currency and his community must take through what, to the great majority, is an uncharted line, at any rate uncharted and unknown so far as they are concerned. It is the average elector who goes to the polls and gives direction, through his vote, to his representative who naturally feels that it is incumbent to carry out the mandate thus conferred upon him.

And in recent years, as a result of general and local conditions, these mandates have largely taken the form of instruction as to what policies should be pursued in regard to questions respecting the uses of currency and credit and the forms they should take. These have lately become important issues in elections, both in restricted community areas as well as in the wider provincial and national fields, not only in this country but in the majority of countries in the civilized world.

This being the case, it is highly important that the electorate should be well posted on at least the fundamental principles underlying the various economic theories presented for their consideration and to know whether or not they are feasible. When new experiments in financing are proposed the electors should have some knowledge as to their feasibility or otherwise and some history, if such is available, to guide them as to the results of similar experiments in the past and elsewhere.

Unfortunately this is not always the case. One hears a great deal of discussion on economic topics wherever groups are gathered together. Some of the contributions to these discussions are based on sound facts and known principles and some, on the contrary are based on pure theorization and largely inspired only by a very natural desire to try something which may prove a panacea.

Equally unfortunately, however, there is always the risk of an uninformed electorate, or an electorate not well grounded in fundamentals, rushing into some experiment which might prove to be disastrous in its effects and result in stepping "out of the frying pan into the fire."

These statements are not made with the intention of decrying experimentation in the economic field. On the contrary. The world and conditions in the world are changing almost daily. Progress must and will be made in this as in other spheres of life. In the field of medicine, in the field of science and in other departments of life, enormous progress has been made in recent years and larger a result of experimentation, but usually it will be found that this progress has resulted by moving forward step by step along the path of construction on accepted fundamental facts. In these fields results are usually only achieved by workers who know and understand basic principles.

Fortunately the public is awakening to a realization that if they are to guide the destinies of themselves and their fellows successfully in the economic sphere they must have a grounding of reliable information on which to base their conclusions and to apply as tests. This is demonstrated by the tremendous increase in the sale of books and pamphlets on these and kindred topics in the last few years and in the increased demand for such works at the public libraries.

The greatest immediate danger that exists in this widespread demand for information is the possibility of confusion on the part of readers who are bombarded on all hands with innumerable theories; but this danger may be avoided or at least partially offset, if the reader will search for definite proven facts, in the light of history and experimentation, and proceed from there to build up his conclusions as to what may be safe and what dangerous.

The proposal to make economics a more important subject of study for the youth of to-day in the schools is one that has considerable merit, but until a new generation is grounded in fundamentals and practical principles, the adults who are being called upon to determine policies for present day adoption must necessarily continue to seek guidance from available literature plus their own good common sense.

## The Coronation Procession

Route As Arranged Will Be Longest On Record

Official announcement of the route to be taken by the King's coronation procession on May 12, 1937, showed the drives to and from Westminster Abbey would be the longest on record, covering nearly twice the distance of the coronation route taken by the late King George.

The route will traverse no street twice, thus giving the enormous crowds expected from home and overseas ample opportunity to see the pageantry.

The route from Buckingham palace to the western entrance of Westminster Abbey will be by way of the Mall, Trafalgar square, Whitehall and Parliament street. The return journey will be via Victoria embankment, Northumberland avenue, Cockspur street, Pall Mall, St. James street, Piccadilly circus, Regent street, Oxford street, the Marble arch and Hyde Park corner.

**Hoard Platinum For War Use**  
Japanese women adorn their fingers with platinum rings in peace time, so that there shall be a large reserve supply of this precious metal in war time. The rings are sold under the direction of the "Japan Platinum Popularization Society."

## Must Obey Or Suffer

Small Wonder Russians Do Not Look Particularly Happy

Hon. W. D. Euler, Canadian minister of trade and commerce, has been looking at Germany and Russia. On a purely business mission, his observations are naturally confined to generalities. But he did comment on the fact that in Moscow, greatest of the Soviet's cities, the people did not look particularly happy. If the sounds like a trite remark, it nevertheless comes from a man who is well accustomed to sizing up crowds in a realistic way. There is value in this. It is a relief from the more familiar and more scientific analyses of Russian systems and developments.

Whatever their benefits and their ideals, the people of Russia to-day are forced to follow a model of life and work set by a small dictatorial group at the head of the state. It is not for them to complain that it is not the way they would choose; they obey or they suffer.—Hamilton Spectator.

## Inscription In Brief

The briefest inscription which has ever appeared on a field marshal's baton is on that which the Duke of Connaught, the senior Field Marshal of the British Army, handed to his great-nephew, the King, at Buckingham Palace. It reads simply, "His Majesty King Edward VIII, field marshal, January 21, 1936." 2165

## The Champion Loser

Man Who Lost Millions By Selling Stock Too Soon

Among the many romantic aspects of the colossal growth of the Ford Motor Company nothing is stranger in all the history of finance, perhaps, than the large fortune made by James Couzens, and the huge loss suffered by Alexander Y. Malcomson, who was Ford's principal backer. Senator Couzens made 29 million dollars; poor Malcomson cheated himself out of close to 300 millions. Instead of becoming one of the world's richest men, he sold his stock for a mere pittance.

The Ford Motor Company was incorporated on June 16, 1903. Fifty-one per cent. of the stock issue of \$100,000 was split evenly between Henry Ford and Alexander Malcomson. Among the other stockholders were Couzens, at that time only a clerk in the cost business conducted by Malcomson, who subscribed \$2,500 and the Dodge brothers, John F. and Horace E., who contracted to build the Fords in their machine shop and who each got a \$5,000 interest in the Ford Company.

In 1906, Malcomson sold his \$25,000 worth of stock to Ford for \$175,000 and probably thought he was doing handsomely inasmuch as he had increased his original investment six times in three years. But wait—Couzens hung on until 1919, a year in which the company's profit was close to 70 million dollars. The Ford family bought Couzens' stock of \$2,500 and paid him 29 million, 308 thousand dollars for it. He was the last minority stockholder. Had Malcomson not sold out till then, he would have drawn out just ten times as much as Couzens did, or approximately 300 million dollars.

Malcomson thus must go down in financial history as the toughest loser on the books; a man who stood to gain the largest profits on record but didn't have the patience or the wisdom to wait thirteen years longer.

## Dream Highway Progressing

Proposed Road Between Alaska And South America Being Developed

The "dream highway"—a good road from Fairbanks, Alaska, to Buenos Aires, South America, 12,000 miles away—is being developed, but there still remains plenty of mileage to fill, of which the missing sections in the mooted British Columbia-Alaska road are the major part.

A tourist from Vancouver can now drive over well-paved roads as far as Mexico City, 3,600 miles, or little more than one-quarter of the mileage that will be available for him when the Pan-American highway is finally completed. The same highway, however, extends an additional 830 miles northward in British Columbia to Hazelton, B.C.

One of the first definite links to be completed will be from Mexico City to Panama, of which 165 miles to Tehuacan is already passable by motor.

Another difficulty in the making of the highway will be the construction of a road over a 400-mile stretch of jungle and mountain from Panama City to the Colombian border in South America.

South America has considerable stretches of excellent road, with occasional rough and rugged patches. In Peru the government laid down 2,000 miles of good road from the northern border of Chile. From there to Santiago in Chile the motorist can travel on another highway 1,377 miles.

From Santiago, a road leads eastward over the Andes mountains, a highway constructed under incredible difficulties and open only in summer. At Mendoza in the Argentine this road joins the Argentine section of the highway which carries on for 850 miles to the southern terminus of the "dream highway," Buenos Aires.

## Stages A Surprise

Geyser In Yellowstone Park Betters Its Own Record

The longest and shortest intervals between eruptions of Old Faithful Geyser were recorded at Yellowstone Park, Wyoming, recently. The usually reliable geyser spouted once at 11:56 a.m. and then burst into action again at 12:26 p.m., a little over thirty minutes. Then followed an interval of 92 minutes, or until 1:58 p.m. Old Faithful seldom varies from 65-minute intervals between outbursts.

"What nation produces the most marriages?"  
Fascination.

More than 6,753,000,000 pieces of mail passed through the British post office department in the last year.

England's average annual income per capita is about \$250.

## Predicts Long Drouth For U.S.

Weather Man Would Move 59,000 Families From Dry Areas

Migration of 59,000 families from the drouth-damaged farms of the great plains of the United States was recommended in a population survey of that area by Dr. C. W. Thornthwaite, former University of Oklahoma climatologist.

His study, published by the University of Pennsylvania, contended wind erosion had damaged 65 per cent. of the plains region, extending from the Canadian border into the Texas Panhandle.

A long-range government program for the return of millions of acres of wheat land to its native sod, he said, might be the only means of checking the devastating dust storms.

Observing long dry spells have been frequent in the history of the plains, Thornthwaite predicted "the present drouth might be prolonged for 20 or more years."

Evidence from tree rings, lake levels and other sources was cited in the survey to show a 40-year drouth began in 1825 and was interrupted by only occasional wet years.

But the weather expert estimated that a minimum of 12,610 families should move out of Montana, the state in which he reported the greatest "surplus population." He urged a migration of 12,200 families from Texas and 7,360 from North Dakota. Heavy removals also were suggested for South Dakota, Nebraska, Kansas, Oklahoma, Wyoming and Colorado.

"The ideal situation in the great plains," he said, "would be a practically complete return to a grazing economy where pasturing on the range is supplemented by the raising of feed and forage crops."

## Newspaper Favors

Many People Who Are Expecting Something For Nothing

We have often reflected upon the slowness of people to thank editors for the favors which newspapers do for them. Individuals and organizations are constantly asking for publicity to assist them in promoting various kinds of worthy causes.

Space is the only commodity aside from circulation which publishers have to sell, and this is a fact which too many seem to forget. Some are even critical of the favorable notices which we give them and their products. Still greater number forget to make any acknowledgment of the courtesy extended to them. We have in mind a biblical instance of ingratitude in which only one in 10 was thoughtful enough to return with thanks on his lips and in his face.—Toronto Mail & Empire.

## Leaves Estate To Secretary

Fleet Street Writer Gave Fortune To Lifelong Friend

The estate of Arthur Anthony Baumann, London, one of the best known of Fleet street writers, was probated at \$86,000 (\$130,000). He left practically all of it to his secretary and lifelong friend, George Browning. Both were bachelors and lived together for 46 years. Baumann suffered paralysis for 12 years and Browning taught him to use his left hand. Baumann was 80; Browning is over 70.

## New Revolver Tested

A new revolver of tremendous power, which J. Edgar Hoover says is mightiest automobile engine with a single shot, is being tested by the United States bureau of investigation which he heads. The gun, 44 to 49 ounces, inflicts a large wound and the impact of a bullet from it was said to have a force of 802 pounds. The regular service type has an impact of only 350 pounds.

"Do you know why your stories aren't a success?"  
"I can't imagine!"  
"Yes, that's the whole trouble."

## All Of Same Make

King Edward's Car Thirty-Seventh Made For British Royalty

The first royal car in the world—it is still in running order—was a 6-horse power one supplied to King Edward VII, then Prince of Wales, in 1889, states the Overseas Daily Mail. From that year the Kings and Queens of England have owned thirty-six state cars, all of the same make. King Edward's new car is the thirty-seventh. The last big car used by King George was made specially for his Jubilee tours in London.

## SELECTED RECIPES

UPSIDE DOWN CAKE

Place 2 tablespoons butter and 1 cup brown sugar in well-greased pan and heat until sugar has dissolved. Cool, and place layer of pineapple, apricots, peaches or any other cooked fruit in syrup. Sprinkle with coarsely chopped nuts and cover with following batter:

- 1 cup butter
- 1 cup fruit sugar
- 2 eggs
- 1½ cups Floury flour
- ½ cup milk or fruit juice
- 3 teaspoons baking powder

## Had Ballots In Pocket

Idaho Judge Was Too Busy Ploughing To Count Votes

After many fruitless telephone calls, unofficial calculators of the primary election reached the wife of a precinct judge in remote southeastern Idaho.

The returns? No, she was sorry she didn't have them. She didn't think Henry had counted the votes yet.

"He's out ploughing and has the ballots in his overalls pocket," she explained. Henry was in a field 10 miles from a telephone.

## Most Unusual Catch

Topping the unusual catches of veteran anglers fishing Quebec waters this summer are a pair of Siamese twin fish recently displayed in Montreal. The fish, members of the guppy family, are getting along well together.

The advantage of using a tax that you feel so happily neutral when a fender is crumpled.

## Trapped For Six Months

Soviet Soldiers Caught In Mountain By Great Blizzard

Three Soviet Robinson Crusoes, trapped in the blind, snowfilled mountain passes of Western Siberia without supplies, not only maintained themselves for six months, but also several escaped convicts, border jumpers and other criminals they captured, according to a drama-filled saga printed in the "Krasnaya Sveta," the official newspaper of the Red Army.

The three Red Army men left Novosibirsk Sept. 3 of last year for a mountain post carrying a month's supply of food and ammunition. A great blizzard swept the land two weeks later. When the men crept from their tough huts, every outgoing pass was obliterated. A border patrol sent to search for the men returned empty handed.

Again in March of this year, when the mountain snows were melting, a squad of soldiers set forth, this time believing they'd come upon the skeletons of their buddies. Approaching the camp, they saw a thin wreath of smoke in the air. Rifle signal was returned with rifle signal. The bearded Crusoes tumbled into the arms of their rescuers.

The marooned men had built themselves stout huts, lived on wild game, with which the region abounds, perfecting themselves in marksmanship so that no bullet was wasted. They had not had bread for six months.

Several lawbreakers, whom they'd picked up in the mountains, and who had lived freely with the Red guards, went back to civilization with them.

## Football Fans Dely Fire

Firemen Had To Force Them From Grandstand In Australia

Three thousand football fans sat amid the smoke of an uncontrollable fire in a grandstand in Sydney, Australia, and engrossed in the game, they refused to move until forced to do so by firemen. A few minutes after they had left flames burst through the floor. Until the firemen acted the fans regarded the blaze as a joke, and paid closest attention to the game, which was not continued despite the fact that clouds of smoke were blowing across the field.

"Opportunity knocks for every man." A woman gets a ring.

MORE CONVENIENT TO USE....

Just hang a package in your kitchen. You'll be delighted with its convenience... for with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses at Calgary, Edmonton, Regina and Winnipeg.

# Spanish Commander Apologised To Britain For Stopping Steamer

London.—Spain swiftly followed her warning to Britain with deeds. A Spanish government warship stopped the steamship Gibel Zorion, flying the British flag, 10 miles from Melilla.

Immediately the battle cruiser Repulse with two destroyers were ordered from Gibraltar to investigate. Crew standing by and decks cleared, the Repulse swept by Europa Point at 20 knots.

For a time voices buzzed excitedly. Then the tension eased. Later advice indicated the Gibel Zorion had suffered no damage. It was assumed the Spanish warship acted under a misunderstanding.

Commander of the Spanish ship apologized as the British destroyers hove into sight and the Gibel Zorion proceeded on its way.

British authorities intimate the despatch of the Repulse was precautionary and no serious sequel is expected.

On instructions from the foreign office Sir Charles Wingfield, British ambassador to Lisbon, refused to accept a note of protest from the Spanish insurgent government at Burgos regarding the alleged bombing of rebel strongholds by French-built planes flying French colors. Britain has not recognized the Burgos government.

The Gibel Zorion, a steamship of 3,455 tons, is owned by the Bland line and operates a passenger and cargo service between Gibraltar and Melilla.

## Demand For Platinum

Has Caused Big Jump In Price Of Metal

New York.—A 23 per cent. jump in the price of platinum to \$53 an ounce from \$43 climaxed three weeks of "very unusual demand here and abroad," reliable trade circles declared.

Bulk of the metal is destined for war purposes, it was said. Platinum figures prominently in chemical warfare, battleship and surgical equipment, dealers stated.

Most of the foreign buying, the trade reported, has come from Japan.

## Lower Lake Rates

Montreal.—Grain brokers reported wheat was in transit from the head of the Great Lakes to St. Lawrence river ports at the lowest freight rate of the year, 3 1/4 cents a bushel. Early in the season the rate was six cents.

## Oldest Indian

Orillia, Ont.—Oldest Indian of this district, Peter Big Wind, hereditary chief of the Ojibway Indians, the remnants of which reside at Rama reservation, celebrates his 97th birthday.

# Germany Demands Apology From Spain For Boarding Nazi Ship

Berlin.—Incensed over the "Kamerun incident," Nazi Germany ordered its warships in the Spanish zone to stand by for action while the commander of seven other warships driving toward Spain messaged Madrid he would "meet force with force."

In strong language Nazi officials demanded apologies from Madrid and assurances there would be no repetition of incidents such as the reported boarding of the German vessel Kamerun by Spanish loyalists.

Admiral Carls, in command of the warships steaming toward Spain, messaged he would "not tolerate" such incidents.

His curt radiograms backed up the government's warning to Madrid that German ships would use "all means at their disposal" to prevent acts deemed overt by the Nazis.

The Nazi foreign office said the Kamerun incident had tossed French neutrality proposals sky high.

Chancellor Hitler was said to be now demanding apologies and assurances from the Madrid loyalists before he would consider binding himself with an arms embargo.

A government spokesman said: "It is impossible to consider the French proposal until satisfaction has been given in the Kamerun affair. Negotiations are continued with the French and British, who are contacting Madrid."

## Moves In Cycles

Scientists Think Radiation Output Of Sun Associated With Drought

Washington.—A study of government moves to aid mounting total of drought-ridden farmers, the Smithsonian Institution held a hope that another major dry period may not strike the north central grazing area of the United States until 1980.

From an analysis of water level records for the Great Lakes since 1837 the Smithsonian concluded that the drought area now "is near the bottom of what appears to be a 46-year precipitation cycle in some way associated with cycle variations in the radiation output of the sun."

Dr. Charles G. Abbot, institution secretary, declared that his cycle hypothesis, announced three years ago, "gives no support to pessimists who predict the great drought area will be converted into a permanent desert."

He said there was "every reason to believe the depths of the present drought will be succeeded, after a most few years hence, by peaks of precipitation." If the cycle continues true to form, he said, the low point should be reached sometime between 1938-40, followed by "a rapid upswing."

## Increased Immigration

Figures For First Six Months Higher Than Last Year

Ottawa.—During the first six months of the present year 5,252 immigrants entered Canada, according to a report issued by the department of immigration. While slightly more than the corresponding period in 1935, the numbers indicate the bars are still up against newcomers. In the fiscal year 1912-13 when immigration was highest, the 12-month figures were 12,841.

Most of the immigrants this year were women and children of men already in Canada. Adult females totaled 2,163, children under 18 years 1,853 and adult males 1,236. The immigration for the corresponding period last year was 4,961.

There was a slight falling-off in immigrants from the British Isles and the United States and larger contributions from the 48 other races from which Canada drew population.

## Judge Is Fined

Edinburgh.—Lord Pitman, a judge of the Scottish court of session, was fined £1 (\$5) for leaving his car outside a house without setting the brakes effectively. The car careened down a steep hill, carried away an iron railing and damaged the coping of a stone house.

## Strict Neutrality

Sir Samuel Hoare Would Keep Britain Out Of Spanish Trouble

Cromer, England.—Warning of consequences that might attend any deviation from the path of strict neutrality in the Spanish civil war, Sir Samuel Hoare, first lord of the admiralty, berated socialists who have publicly supported Spain's leftists.

"As a rule the parties of the left are pacifists," he said. "Our parties of the left are militarists, but militarists who want war without armies, navies or an air force."

"Many of them seem to want war against one of the factions in Spain. Let me say to them that the National government have not the least intention of interfering in the internal affairs of Spain or embroiling this country in a grim and detestable struggle that is not our direct concern."

"If we attempt to impose our will upon the Spanish factions, we might well involve Europe in a general conflagration. Let us rather maintain a strict neutrality."

"Lansbury (George Lansbury, veteran Labor M.P.) proposes that we should throw the weight of our country and empire into the scales on the side of one of the Spanish factions. What more irresponsible proposal could be imagined? To take side in a factional fight in Spain would mean inevitably another peninsula war with the great body of the Spaniards against us. It would mean almost inevitably a conflagration that would spread from one end of Europe to the other."

"Let us learn the lesson that these events have to teach. If politics get into the hands of extremists and fanatics, then the bullet and the bomb take the place of the ballot box."

"In this country," Sir Samuel added, "we need no Fascists to fight Communists. We fought and defeated Communism by increased prosperity. We destroyed revolution, not by blackbists, but by ordered progress and free discussion."

## Seeking Subsidies

Union Of Canadian Municipalities Would Stimulate Home Building

Vancouver.—A municipal movement designed to bring about a system of Dominion government subsidies as a stimulant to home building, has been launched by the Union of Canadian Municipalities.

Sponsored by the Winnipeg delegation, a resolution was adopted which contended private initiative had failed to meet housing requirements on a lower rental basis and that existing federal legislation was inadequate. The union resolved, therefore, the federal government be asked to provide subsidies to permit local organizations and groups to build necessary new homes.

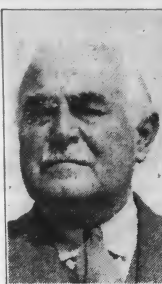

## Return Visit

English Cricket Team May Come To Canada Next Year

London.—A return visit by Canada by an English cricket team was projected by the Morning Post in bidding farewell to Hon. R. C. Matthews' Canadian XI, which has just completed an "all too brief" tour of the British Isles.

The Post said the Canadians had "proved themselves possessed of conspicuous ability. Manifestly there must be a return visit to Canada by an English club." The paper felt sure that the English public school would gladly co-operate and that the M.C.C. would arrange to finance the tour.

## WILL SPEAK IN CANADA

Rt. Hon. Vincent Ellihank, President of the Conference of Chambers of Commerce of the Empire which will hold its meetings in New Zealand in September, will address several organizations while on his way across Canada. He is a descendant of a military Governor of Quebec in the early days of British rule, and one of his titles is Baronet of Nova Scotia—the eleventh of the line.

## Charged With Murder

Investigations Continue Into Fire And Explosion In Montreal

Montreal.—Julius Cohen, 49, was charged with murder and Romeo Vidal, 35, charged with arson as investigation continued into the fire and explosion that razed a block of stores here, killing three firemen and injuring 50 other persons.

Cohen, co-proprietor of Maison Canadienne, clothing store destroyed by the blaze, was arraigned in magistrate's court on the murder charge, after a coroner's jury found him criminally responsible for the death of Fireman Albert Guerin, Pierre Plouffe and Francois Beaulieu. He was remanded for preliminary hearing.

Fire Commissioner Massicotte, who signed the warrant for Cohen's arrest on arson charges, reopened inquiry into cause of the fire, and after hearing several witnesses ordered Vidal, manager of the clothing store, arrested on a charge of arson.

## Australia Rearmament

Program To Be Launched In Commonwealth In September

Sydney, Australia.—A supplementary defence program will be launched in the commonwealth in September, it was announced officially.

This will amplify the three-year program begun in 1934 and the country will embark on a period of intensive rearmament while the two programs overlap.

In a speech at Manly, N.S.W., recently, R. A. Parkhill, minister for defence, announced the government would shortly consider "a new defence program to complete the commonwealth's defence against air raids."

He forecast increase of 4½ air force personnel to 2,660 with a citizen force of 395 members, and said he hoped the manufacture of aircraft would soon be established in Australia.

## Trade Mission To Far East

Montreal.—A trade mission to the far east, sponsored by the Canadian Chamber of Commerce with the support of the department of trade and commerce and co-operation of the Canadian Manufacturers' Association, will leave Vancouver for China January 19, 1937, it was learned here.

## GOVERNOR-GENERAL IN THE WEST

On his first visit to Western Canada, Lord Tweedsmuir seems to be enjoying his official duties, judging by the smile he has here for Mr. A. J. Haggart (left), who received a warrant as Rover Scout Commissioner from His Excellency while the Vice-regal party was in Regina. In the centre looking on is Judge Rimmer, of the district court at Arcola, Sask.

# Italy To Ban Arms Shipments To Spain If Other Nations Agree

## May Abolish Penal Colony

Dreaded Colony In French Guiana May Disappear

Port Of Spain, Trinidad.—Rumors France's storied and dreaded penal colony in French Guiana was to be abolished soon were heard after Trinidad authorities set four fugitives from Cayenne adrift in an open boat and arranged to deport seven more the same way.

Patched and exhausted after their hazardous journey, most of the seven remaining were too ill to be driven off this British island for several days. Two in serious condition were being treated in the hotel of the Salvation Army, long the friends of French fugitives.

As the police granted them brief respite here, members of the Trinidad Labor party, acting in co-operation with the English Labor party, pleaded with the French consul here on their behalf.

Given a new small boat and food for three weeks, the four were towed 12 miles out to sea by a police boat. When last seen they were rowing toward Venezuela.

They had been here nearly two weeks recovering from the effects of their trip from Cayenne.

## Offers Help For Eskimos

San Francisco Trader Willing To Take Food To Arctic

Barrow, Alaska.—Asserting it was uncertain whether an emergency government food supply would arrive here before the ice closes in for the winter, Dr. Henry W. Greist, medical missionary, reported a trader had offered to land \$5,000 worth of food to relieve 500 starving Eskimos along the Arctic rim.

The missionary said the food offer was made to the Indian bureau office at Juneau by Captain C. D. Pedersen. San Francisco trader now in the vicinity of Herschel Island.

"A message from Captain Pedersen reports many people will starve on Barter Island, barring the arrival of ample relief," said Dr. Greist.

Barter Island, 275 miles east of Barrow, and Demarcation and Herschel Islands were reported as the worst affected areas.

## Good Crop At Peace River

Edmonton.—Hum of harvesting machinery now is heard throughout northern Alberta with cutting of a splendid crop now well under way, according to report on crop conditions compiled by the Northern Alberta Railways. Showery weather in some districts delayed harvesting, but this week cutting is general, reports indicate. Throughout the Peace River territory grain is in good condition.

## Casualties Are Heavy

Paris.—During the last four weeks 55,000 Spaniards have died in the civil war, the Madrid correspondent of the newspaper Excelsior has estimated. Of the total, 25,000 were Loyalists and 30,000 were rebels. According to Excelsior's figures, the revolt has made 25,000 widows and 80,000 children orphans.

# Gen. Smuts Blames Civil War In Spain On League Of Nations

Durban, South Africa.—General Jan Smuts, deputy prime minister of South Africa, blamed the civil war in Spain on the League of Nations' handling of the Italo-Ethiopian dispute and declared the situation in the Mediterranean is "far more dangerous than ever before."

"I look upon the revolt in the Spanish army in Morocco and the civil war in Spain not only as a dangerous symptom in itself, but also as another product of the breakdown in co-operation in the League of Nations during the Italo-Abyssinian crisis," the South African statesman declared in an interview with The Natal Observer.

"I am sure the Spanish business is closely connected with the Italian business and that the two together have created a situation in the Mediterranean which must necessarily give the greatest concern to all Mediterranean powers."

General Smuts said that if France and Britain had stood firm in the Italo-Ethiopian crisis and had seen the league through, the position in the Mediterranean would now be altogether better. The league would have proved itself and become a real bulwark against revolt and aggression. Not only had the breakdown of the league resulted in the Mediterranean situation but in a wild armaments race.

"I am firmly convinced that only firm courageous action by France and Britain can stop the revolt," General Smuts concluded. "Abyssinia was a grave warning and perhaps the events in Spain were of an even more ominous character. Talk about reform of the league is mere camouflage. I wonder whether it is not more necessary the important great powers should come together at this moment in informal conference than in another spectacular show which will lead nowhere."

## THE COLEMAN JOURNAL

Published Every Thursday at Coleman, Alberta. Membership in Canadian  
Weekly Newspapers Association and Alberta Div. C.W.N.A.

THURSDAY, AUGUST 27, 1936.

## NOTES AND COMMENTS

COLEMAN'S school board is deliberating the expenditure of possibly \$35,000 to build additional accommodation for public school classes. Some hesitancy prevails because they wonder how public opinion will react to the proposal. The junior grades at present are housed in small out-of-date so-called "cottage schools," really they are dwellings made over as class rooms. Comparing an up-to-date class-room with these out-moded recalls little private schools in old world villages. If the trustees desire public opinion to guide them, the quickest way to secure it would be to take a vote. Parents might well seriously consider the matter, or make a visit to the "cottage schools." One class was held in a club room adjoining a church, where the ventilation was so poor that it was a wonder the children didn't go to sleep. Another is held in a place where conditions are not even quite as good. For ten years or more this condition has prevailed. Most people will agree the time is ripe for improvement, which ultimately may prove more economical than housing junior classes in four separate small frame buildings, each heated by hot air furnaces.

YOUNG people's organizations are non-existent because of lack of leadership. The only organization showing activity is the Girl Guides, because it is fortunate in having a few ladies who give time and experience in "Guiding." For older people the same condition exists, and the only meeting places for men are the beer-parlors.

TOWNS are just what we make them. An educational campaign among business men might awaken them to the benefits that would accrue were we to have an organization which would bring citizens closer together in common purpose for the welfare and advancement of the town's interests. In earlier years, judging from old editions of The Journal, when the population was smaller, there appeared to be local organizations working for the common good. The swimming pool was built mainly through Women's Institute activities, but later no organization would take the responsibility of operating it, with the result that several thousand dollars were uselessly expended, unless steps are taken to again make use of it. The erection of the skating rink costing over \$20,000 was built through community co-operation; a splendid achievement for a town the size of Coleman. An enterprising service club were it organized would be of value in giving leadership and people would be happier because they would find many useful undertakings to engage in. A man makes or mars his own career. The same rule applies to towns. Leaders are wanted.

BOYS with guns! Everywhere you look, around corners, in back yards, around your own back door, someone is holding up someone else with a gun. Some are two-gun men, and get the "drop" on you in double quick time. Of course, the rubber bands they shoot do not hurt anyone, though a dog might give a couple of yelps if they catch him where the hair is particularly short. But the significance of it is that seeing gun men in pictures thrills the imagination of the "kids." A "tough guy" is something to be admired. It serves to show that the other side of the picture, that crime doesn't pay, and that the tough men usually come to a tough end, should also be shown to the boys.

MOST people like to listen to that which pleases them. It is pleasant to the ear and soothes their minds. But if all were to resign themselves to this attitude toward things in general and political problems, the world would stagnate. Every man should do some thinking for himself, or at least try and read sufficiently to become conversant with the problems of the day. Do not confine yourselves to just one side of the picture or story. Political propaganda naturally is for the purpose of creating a favorable impression of those responsible for it. People must use their own powers of thought if they do not wish to be included in the vast army of those who are too prone to follow opinions and policies ready made in attractive form.

JOHN HERRON has passed on. Familiar figure of southern Alberta, mounted policeman, rancher, legislator, he rounded out a useful life of 82 years. Links with the province's early history pass on. Glamor and romance, of 50 or more years ago, increase in perspective. What a contrast with the outlook on life then and to day. Men and women wrested a living from a new land the best they knew how. No relief grants, promises of money they did not earn or other hand-outs were thought of. Moral fibre and staunch integrity were the ingredients of men and women of those days, and are yet of those who are determined to make the best of conditions, as did the early-timers. Honor to the pioneers, of whom Honest John was a worthy representative.

WITHOUT character business agreements, like war debt notes, are mere scraps of paper. There's always a lawyer somewhere who can find a big enough loophole for a corkscrew.

EASY WORK  
Most anyone can be an editor. All an editor has to do is to set at his desk six days in the week, four weeks in the month and twelve months in the year, and "edit" such stuff as this: "Mrs. Jones of Lost Creek let a can-opener slip last week and cut herself in the pantry."

### Local News

Born to Mr. and Mrs. Sam Cook on Aug. 21, a daughter.

Mr. and Mrs. George Derbyshire and Mr. and Mrs. T. Blower left on Saturday for two weeks holiday in Vancouver.

Miss Anna D'Andrea, nurse-in-training at the Royal Alexandra hospital, Edmonton, is spending her vacation with her parents here, and will leave on Thursday for Lethbridge and Calgary to visit friends before returning to duty.

On and after the First of September police court summons will be issued against all persons owning, keeping or harboring an unlicensed dog within the town, contrary to the by-law. This notice was published in the Cranbrook courier.

Mr. and Mrs. John McDonald returned last Friday from Edmonton, where Mr. McDonald has been attending summer school. They settle down to married life in Coleman with the good wishes of a host of friends, and have apartments in the suites above McGillivray Co. offices.

Mrs. Mary Neil, former Coleman resident, now living at Kettle Valley, B.C., who was a recent visitor here, is a regular subscriber to The Journal and enjoys reading the news of the town. Renewal subscriptions from readers over many years show that they appreciate reading the local news long after they move to other parts of the Dominion.

At last there is a place with the name of Coleman painted in sufficiently large letters that strangers may ascertain the name of the town, provided they look upwards, Andy Thornber, the most versatile painter in town, in fact the whole Crows Nest Pass, was commissioned by the Coleman Hotel to paint the name in large block letters on the front, and he has made a good job, midway between the ground floor and the top deck.

Four garden raiders who used a car in their thefts were given a scare recently when a householder quietly watched them steal from his garden, and took their car license number. Two young girls from Coleman and two young men of Blairmore were the guilty parties. When accused of the theft they promised never to do it again. Provlvers have caused a lot of trouble to garden owners, who not only steal but do a lot of damage too. A darned good old-fashioned hiding will do them the most good.

## Weddings

### COOKE-LOWE WEDDING

A pretty wedding was solemnized on August 21st, at 10 a.m., in St. Paul's United Church, when Miss Maurren Cooke, elder daughter of Mr. and Mrs. M. W. Cooke, and Mr. Robert Lowe, son of Mr. and Mrs. James Lowe were united in matrimony. Rev. J. H. Bevan officiating. The bride, dressed in white satin and bridal veil, with a bouquet of lilies and pink roses, entered the church on the arm of her father to the strains of the wedding march from Lohengrin, played by Miss Gwen Brown. She was attended by Miss Marjorie Van Maaron, of Lethbridge, as bridesmaid, who looked charming in a dress of mauve chiffon, with picture hat trimmed with mauve and carrying a bouquet of purple, mauve and white sweet peas. The groom was attended by Mr. Howard Ash as best man. During the signing of the register, a vocal solo, "I Love You Truly," was beautifully rendered by Miss Gwen Brown.

The church was prettily decorated for the occasion through the kindness of Mrs. A. Beveridge and Mrs. W. Milley.

Following the ceremony, the party repaired to the home of the bride's parents, where a wedding breakfast was enjoyed. The health of the bride was proposed by Rev. Mr. Bevan, in a speech happily combining humor with sound advice and good wishes to the bride and groom, following which the happy couple left on the afternoon train for a short visit in Lethbridge.

### BOWEN-JOYCE WEDDING

Married: On Aug. 19, at Hillcrest, James Joyce and Maidia Bowen, both of Coleman, Rev. John Wood officiating.

Both young people are well known here, "Jimmy" Joyce being one of the stars on the Canadian hockey team, who has lived here with his parents for a number of years, who are old timers of the Crows Nest Pass. The bride has also lived here and at Pincher Creek since childhood, and went through public and high schools here. Her parents have lived here for many years, since moving from Pincher Creek. Good wishes are joined in by many friends of the newlyweds.

### Blower-Griffiths Wedding

Thomas Blower, only son of Mr. and Mrs. Tom Blower, and Myfanwy, second daughter of Mr. and Mrs. J. T. Griffiths, both of Coleman, were married on Aug. 22 at Blairmore, by Rev. A. E. Larke. The bride's sister, Thelma, was bridesmaid, and Lawrence Picard of Blairmore was best man. The bride carried a beautiful bouquet of roses and carnations, and the bridesmaid a bouquet of carnations. The wedding breakfast was served at the home of the bride's parents, on Sixth street. Both young people are well known and the bridegroom is employed at the International mine. He is also a member of the popular Arcadians orchestra.

### Houghton-Haman Wedding

A pretty wedding was conducted at the United churchmanse on Monday afternoon, when Miss Hilda May Houghton, only daughter of Mrs. J. H. Houghton, became the bride of Mr. Peter Haman, of Natal. The bride was given in marriage by her brother, Ernest Houghton, and the matron of honor was Mrs. G. Duffield. The groom was supported by Mr. Leslie Beech, of Natal.

Following the ceremony a wedding supper was served at the home of the bride's parents, after which the happy couple left for Spokane, where they will spend ten days. They will reside in Natal, B. C., where Mr. Haman is employed.

### Certificates Detrimental to Those Whom Designed to Benefit

The Editor of The Journal: I would like to make a few remarks concerning the article in your issue of August 20, 1936, dealing with the "Quantity Theory" of money in relation to the issue of Prosperity Certificates by the Government of Alberta.

This monetary theory is borne out by the effect of the quantity of money in circulation to the commodity price index. As to whether the money is backed or not by gold or other commodity that may be suitable, does not alter the circumstance. It is merely an application of the Law of Supply and Demand. Other things being equal, the more money in circulation the smaller the purchasing power of each unit.

We should not overlook an important condition which should be very carefully considered in relation to the "Quantity Theory." That is the "Velocity Factor" or rate of turnover. A thousand dollars used ten times in payment of goods and services, does the same work, consequently is as effective as ten thousand dollars turned over but once.

The velocity of Prosperity Certificates will have the same effect, in comparison with the normal turnover of money, as a large increase in the number of certificates issued. Hence a depreciation in their value.

What will be the behaviour of the Canadian Dollar? Should sufficient Albertans subscribe to this severe form of taxation, there will be a tendency for our dual currency to follow along lines as prescribed by Gresham's Law. This law boiled down, states that when two currencies are circulating together, the depreciated one will drive out the good; which is quite natural as people will keep the good money, and eventually it becomes scarce.

Under these circumstances, we would find two prices for goods—one for "Prosperity Dollars," and one for Canadian Dollars; the latter reasonably conforming with the price index for Canada, the former continually rising as the holders of ever increasing certificates demand goods in exchange. (In this connection it must be remembered that the dollar is free to flow to other parts of Canada, while the Certificates are confined to the Province.)

Examining this experiment under the light of accepted economic laws, it is difficult to see how it can be but detrimental to the very people it was designed to benefit.

Should there arise the objection that "Prosperity Certificates" are not money, I think that all are agreed that they are made to represent purchasing power. All forms of purchasing power including money and issues of this nature, are governed, as far as we are concerned, by the same laws of cause and effect.

Yours very truly,  
E. J. G. Moore.

Coleman, Alberta,  
August 24, 1936.

"What makes you think so?"  
"Well, I called out 'four' in the elevator—and everybody ducked!"

## Fashion Service

By JANE DLE

ARE you one of those smart out-of-town women who is interested in the latest fashions of the day, who wants to be well dressed yet hasn't the time or opportunity to shop around?

Why not take advantage of this new Stylst Service created for you by EATON'S? All you need to do is write to me at Winnipeg and I will gladly help you solve your fashion problems.

Perhaps you are in doubt as to what the new colors, fabrics and fashion trends are for Fall. Maybe you are going to some special affair and would like advice regarding the correct frock for the occasion. If you have a new dress or coat and are not sure what type of accessories you should wear with it, just describe it in your letter and I will try to give you several helpful suggestions.

Remember that this Service is available only at EATON'S Winnipeg Mail Order. Also that it is not a Shopping Service. I act solely in an advisory capacity.

Jane Dle

## WORLD HAPPENINGS BRIEFLY TOLD

General Evangeline Booth of the Salvation Army, will leave London in November for a tour of the Far East.

The United States egg-laying record was scratched off the book by a Maine hen which laid 214 eggs in 214 consecutive days at the state experimental station in Monmouth.

Although dead since birth, B. L. Pletcher, 26, of Worthing, England, has taken his bachelor of science degree (second-class honors) at the London University.

Hans Eduard Giese, 32, was beheaded in the first execution under Germany's new death penalty for kidnapping. Giese was convicted of kidnapping the 11-year-old son of a Bonn merchant, June 14.

H. A. Taylor, of Clear Prairie, west of Faust, Alberta, has not got hot and cold running water at his farm home but he has running water. He diverted a small stream and now fresh water flows by his doorstep.

The last remaining link between Emperor Haile Selassie and his East African empire was severed by the Italian invaders with publication of a decree confiscating all the fugitive emperor's property and possessions. Huguenot Park, historic Bucking-hamshire estate, which was the home of Benjamin Disraeli, has been bought by High Wycombe borough council as a memorial to King George.

Revolving diplomatic tactics rare since prohibition days, the British government has made representations to the United States against coast guard seizure of an alleged rum runner flying the British flag.

Discovery in Saskatchewan of a triceratops, a species of horned dinosaur, has aroused interest in the Royal Ontario museum possesses a specimen of this type.

### Clears Up Puzzle

Rings On Fish Provide Data For Their Movements

Microscopic annual, or growth rings, on the scales of striped bass are providing science with new data explaining for the first time the mysterious movements of fish that have puzzled fishermen for generations.

Daniel Merriman, graduate student in zoology at Yale University is completing an extensive study of the growth rings on bass at the mouth of the Niantic river, and has found that the rings correspond to the growth rings in bass at the mouth of a microscope, the annual reveal the age of the fish, the rate of growth, and whether it goes south in winter.

"If the fish spends most of its time in warm water, going south in winter, it grows faster and the space between the rings is wider," Merriman declares. "The reverse is the case if the bass spends its time in colder waters along southern New England shores."

"This latter condition has been found to be the case in about 10 per cent of the scales examined thus far, indicating that a large majority of striped bass found in Connecticut waters go south for the winter."

By means of netting, tagging and releasing more than 500 of the fish in the Niantic river, data indicating the time of bass migrations also is being studied. Based on returns by fishermen of about 8 per cent of the numbered tags, it is apparent that the spring migration northward arrives in April and moves along toward Rhode Island through May and June.

### A Talking Chair

Cincinnati Dentist Says It Helps Entertain His Patients

A Cincinnati dentist told the National Dental Association "Beethoven's Fifth Symphony can be of great assistance when the dentist tackles a stubborn molar."

Dr. J. H. Sharon, addressing 200 Negro dentists attending the convention, disclosed for some time that he had entertained patients with music, literary discourses and reports of ball games provided by means of devices attached to the head rest. He said the "talking chair" could be manipulated so only the patient heard the program or so all within the office heard it, as desired.

Clerk: "Please, sir, there's a traveler been waiting two hours to see you."

Queen: "Send him away, and apologize for not having done so two hours ago."

There are references to blood transfusions in the writings of the ancient Greeks, Romans, and Egyptians.

### "The Great Barrier"

Canadian Film Epic, Produced In Rockies, Is Near Completion

Revelstoke, a mountain-walled community of British Columbia, is viewed with no little interest the making of an epochal film of an historic Canadian development, one that admittedly cemented the West with the East at a time 50-odd years ago when it appeared that the Pacific Coast people would hew a line permanently apart from the young confederation of provinces and when the prairies were stirred by rebellious activities. The picture that is taking final form is "The Great Barrier" which is being produced in Revelstoke and the rugged areas around Golden, Field and Lake Louise by the Gaumont British Picture Corp., Limited.

For the making of this picture, which deals directly with the truly precarious construction of the lines of steel through the treacherous mountain regions of British Columbia and Alberta which were to form the first transcontinental railway, the largest production unit of any film company ever to invade the Dominion has been at work for many weeks.

Last March saw the arrival of the first band of film people from the London studios and they started right in to make snow scenes at Glacier while the whole countryside still bore a white mantle. More technicians followed at intervals until June 29 when the main party of artists and the direction staff, comprising 81 persons and headed by Richard Arlen, leading man of the cast, reached Revelstoke to find the "Moodyville" street set already erected—a seemingly complete settlement only two short blocks from the city's modern main street.

With the subsequent arrival of J. Farrell Macdonald to portray the role of "Major Hell's Bells Rogers" and five other players from Hollywood, there were less than 44 members of the unit on the scene including 12 artists and the production, direction and technical staff, all but two of which were from England and Hollywood. In addition, there are swarms of extras, carpenters, painters, electricians and property men who have been mobilized locally. Apart from the main party of 100 persons are on the regular pay roll of the unit.

The picture gives a general idea of the size and scope of "The Great Barrier" company for the producing of the Canadian picture, the actual locations of the historic railway project which, according to an official estimate by the Canadian government, will cost a cool million dollars before it reaches the theatre screens.

To make the picture, the "Great Barrier" horsemanship have been recruited locally, there are railway employees to operate the trains, and others from Vancouver. Chinese have been recruited locally, there are railway employees to operate the trains, and others from Vancouver. Chinese have been recruited locally, there are railway employees to operate the trains, and others from Vancouver. Chinese have been recruited locally, there are railway employees to operate the trains, and others from Vancouver.

Among the widely-known stars on location are Fred Astaire, popular hero of scores of pictures who spent three months in England on "The Great Barrier" before leaving for London on June 26 to appear in the first big British picture; Antoinette Celler, leading lady who starred in "Cousins Alone" before turning to the Canadian feature; J. Farrell Macdonald, character actor who has spent 20 years in pictures; Roy Emerson, veteran of stage and screen; Lilli Palmer, petite Viennese star, and Ben Welden, known on both sides of the Atlantic. Milton Rosner, the director, has handled a number of important pictures, among his latest being "Everything Is Thunder," starring Constance Bennett, and "Mr. Hobbs" in which George Arliss played the title role. Incidentally, the Gaumont British unit is using canvas in a camp which has been established in the Kicking Horse Pass from which the players proceed to location for the filming of scenes in the heart of the Rockies.

### Authority On Heraldry

Office Held By Sir Gerald Wollaston Dates From 1418

Sir Gerald Wollaston, King of Arms, was responsible for the ancient ceremony of producing the King's Coronation next May. He is a barrister and an ex-diplomat, as well as an authority on everything connected with heraldry and pageantry. The two are in his blood, for his grandfather was a Herald at Queen Victoria's Coronation. His father, Sir Naylor Wollaston, compiled the standard Anglo-Persian Dictionary. Sir Gerald has held the office since 1930, and will have to retire in three years, when he will be 65. It is his business to supervise the work of the College of Heralds. His office dates from 1418. 2165

### FORMER GOVERNOR-GENERAL IN NEW ROLE

The procession of civic dignitaries in procession from the Castle Keep to the Church of St. Mary-in-the-Castle at Dover when Lord Willington was installed as Lord Warden of Cinque Ports.

### Judge Criticizes Himself

Apologies In British At Court For Remarks Made At Trial

At the London Session recently the presiding judge, Sir Herbert Witherford, not only withdrew some remarks he had made in the course of a trial in which the jury stopped the case, but criticized himself for having made them.

"I ought to say with some regret," he said, "that some observations fell from me yesterday which ought not to have been done. They were made under the influence of temporary emotion of which no one occupying the position I do ought to be guilty." This is a handsome apology, one which could not have been more ample, unparaphing of himself and does his lordship proud. A public man who is capable of apologizing in public and even condemning himself, shows that he is a "big" man to do it, and worthy of the office he holds. This is in the British tradition of things, and ranks with the apologies which have been made in the House of Commons by Premier Baldwin and other cabinet ministers who have openly apologized when they erred in making some statement.—St. Thomas Times-Journal.

### Diamond Trade Improving

Continued improvement in the South African diamond trade has led to the belief that Kimberley will resume full production this year. The Dutoitspan Diamond Mine is being re-opened and possibly will start production on a normal scale soon. Another Kimberley diamond mine will be ready for re-opening before 1937.

The only thing some people have in common is the weather.

Some men are fired for ambition; others for the lack of it.

### Situation In Palestine

Conflict Over Jewish Immigration And Land Ownership

The troubled situation in Palestine where the conflict over Jewish immigration and land ownership has broken into open fighting, was considered in an special session of the World Jewish congress at Geneva.

David Ben Gurion, in a message delivered from London, warned of "the danger that the doors of our homeland may be closed" in a cessation of immigration which has been objected to by Arab leaders.

Gurion, who is chairman of the executive of the Jewish Agency for Palestine, recognized by the League of Nations as the supreme Jewish authority in the Holy Land, and president of the Palestine Jewish Federation of Labor, addressed his message directly to the congress, the first international assembly of his kind.

"There is need for the mobilization of all Jewish forces in defence of our rights in the Diaspora (all lands outside Palestine) and on behalf of Palestine," he said.

### Makes A Difference

"What is the matter, my little man?" asked a sympathetic stranger of a small boy whom he saw crying in the street.

"Please, sir, my dog's dead," sobbed the boy.

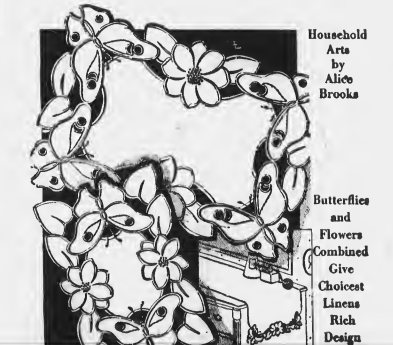

"Well," said the man, "you mustn't make such a trouble of it. My grandmother died last week, and I'm not crying."

"No," said the boy, "but you didn't bring her up from a pup?"

We cannot always oblige but we can always speak obligingly.

Ice cream was known as long ago as the 17th Century.

### Rejoice In Cutwork Without Bars

PATTERN 5645

This cutwork in simple lines—no bars—will transform your buffet or add a smart touch to your entertaining when used as tray cloth or dolly. You can do the flowers and butterflies all in natural colors or do the entire design more conservatively in one color. In pattern 5645 you will find a transfer pattern of a dolly 10x15 inches and two dolly 7x10 inches; illustrations of all stitches needed; material requirements; color suggestions. To obtain the pattern send 20 cents in stamped coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

### SUNDAY SCHOOL LESSON

AUGUST 30

#### BEGINNING OF WORLD MISSIONS

Golden text: And he said unto them, Go ye into all the world, and preach the gospel to the whole creation. Mark 16:15.

Lesson: Acts 11:19-26; 13:1-12.

Devotional Reading: Isaiah 42:6-10.

#### Explanations And Comments

The Gospel Preached to Gentiles in Antioch, Acts 11:19-21. The persecution that followed the death of Stephen turned out to be a missionary society unconsciously organized by the Jews of the new faith. "The storms of persecution are only winds which fan the fire of faith and carry the sparks of truth to a distance." They carried the fire to other Jews as far as Phoenicia and Cyprus and Antioch of Syria, and then Cyprian and Cyrenians came to Antioch and proclaimed Christ even to the Greeks also, with the result that a great number believed and turned unto the Lord.

Of the establishment of the church at Antioch Jerusalem was as unconscious as the average church in America is of the establishment of a church in Uganda. What first concerned Jerusalem was the rescue of men and women outside the Jewish faith who were being baptized at Antioch. Peter had investigated the somewhat similar situation in Samaria, and now Barnabas was sent to look into this unauthorized revival among Gentiles. Barnabas was full—not of doctrine and prejudices—but of the Holy Spirit, of faith, faith in God and in his neighbors. He approved of the new departure of preaching to Gentiles, exhorted the people "to leave unto the Lord with purpose of heart," and their number increased rapidly. Ten or twelve years had passed since Paul's great enlightenment on the way to Damascus, and during this time he had been in his native city of Tarsus where the church at Antioch needed more leaders, and Barnabas remembered Paul. He went to Tarsus for him, and Paul returned with him as his co-worker in the church.

It was here at Antioch that the disciples were first called Christians—Christ's men. Orthodox Jews before this had called them Galileans or Nazarenes, and they had called themselves learners, disciples, the faithful, believers, brethren, those of The Way.

#### Third Man In Cab

Head Brakeman On Freight Train Is Not Very Comfortable

A news item that sounded puzzling to the layman came out of Washington the other day. It said that the Brotherhood of Railway Trainmen had asked the Interstate Commission, the body that rules U.S. railroads, to order the railways to equip their engine cabs with softer seats, foot warmers and padded arm rests.

The explanation, however, is simple. The head brakeman on a freight train sits to ride in the engine cab. He's the conductor's lieutenant at the front end, keeping a watch up there, getting down to turn switches, keep an eye on the string of cars back of the engine and doing the many other little things a trainman is high up to.

But when the train is moving there's not much he can do, except sit in a corner of the engine cab and look out. To be out of the way of the engineer and particularly of the fireman, who, unless he has the help of a mechanical stoker, is busy shovelling coal under the boiler, the head brakeman gets into a spot somewhere near one corner of the boiler. It's a hot spot and the summer, a cold-on-one-side-and-hot-on-the-other-side in the winter, no cushion or arm rests soften the jabs of the locomotive during fifty or sixty miles. If he puts his feet up against the boiler they roast; if he doesn't, they freeze. So curtains, padded arm rests and foot warmer are in order.

In Canada, we are told, a similar request has been made to the Board of Railway Commissioners, the Dominion's railway ruling body. But for some reason or other, foot warmers are not demanded, probably because Canadian trainmen are not subject to "cold feet."—St. Thomas Times-Journal.

#### Strange Collection Of Plants

St. Louis Garden Has Thirteen Different Species From Antarctic

Shaw's Garden at St. Louis, Missouri, is an acre of ground over for the display of plants and flowers, now has on exhibition thirteen different species of lichen plants—a collection of Admiral Richard E. Byrd, famed Arctic explorer.

The collection, as strange and undisciplined as it is, has yet been offered to nature lovers at Shaw's Garden, represents the last bit of vegetation the Byrd expedition saw as they approached the South Pole. The rugged, moss-like growth was observed by the expedition as it eked out a precarious existence on the northern exposure of mountainous rocks within 200 miles of the pole itself.

A flea, 21 inches long and having saw-like teeth has been found at

### A Valuable Discovery

Scientists Find Poison Ivy And Vitamin C Are Related

A peculiar relationship between vitamin C and sensitiveness to poison ivy has been observed by scientists on guinea pigs. When the animals were on a diet deficient in the vitamin, they were insensitive to the poison ivy, but when the vitamin was applied to their skin they became sensitive to the poison ivy and exhibited severe reactions.

Application of the vitamin to the skin was necessary to produce this sensitiveness, reports Dr. F. A. Simon, of Louisville, in a report of his experiments published in "The Journal of Immunology." When the vitamin C extract was injected into the veins, the muscles or the abdomen, the sensitivity was not produced or only to a slight extent.

The whole body of the guinea pig became sensitive to the poison when the vitamin was applied to only a small area. The agency in the skin that produced the sensitization spread rapidly. If the area of the skin to which the vitamin extract was applied was removed within 24 hours, the sensitivity to the poison did not develop in the skin on other parts of the body. If removal of this spot of skin was delayed longer than this period the sensitization spread to all parts of the skin.

Efforts to get this same reaction in rabbits, rats and cats were unsuccessful. What possibilities this discovery has for making human beings less sensitive to poison ivy or for treating individuals suffering from contact with the plant still remains to be discovered, as no experiments with human beings have been made. There is a great difference in sensitivity to poison ivy. Some people can touch the glossy leaves of the plant with impunity, while others develop severe inflammatory outbreaks all over their body if they come within ten feet of the plant. The poisonous factor in the plant is a volatile oil. Those who are extremely sensitive are affected by a small amount of oil that is evaporated from the leaves carried as vapor in the air and condensed on their skin. Persons with light-colored skins seem to be least sensitive to poison ivy.

Vitamin C, which produces the sensitivity to poison ivy in guinea pigs, also is known as ascorbic, hexuronic and cetivamic acid. It prevents scurvy, which affects the bones, skin and muscles and which is sometimes accompanied by hemorrhages of the skin. It is contained in many fruits and vegetables. It was first extracted in bulk from orange and lemon juice and later was obtained much more plentifully from paprika.

### Recruiting In Britain

Military Leaders Trying Hard To Fill Up Empty Ranks

Recruiting propaganda of every description now floods Britain as military leaders seek to encourage reluctant British youth to join the colors.

With oratory, appeals to national pride, emphasis on the advantages of army life, and attention to the seriousness of the situation, the efforts to fill empty ranks in the territorial forces appear to be daily becoming more pronounced.

Secretary of State Duff Cooper leads the pressure for recruits with his outspoken comments on pacifism and war dangers, and with his hints that conscription may become necessary.

### Pedigree Dogs Are Costly

American Owners Spend \$30,286-\$92.50 In Six Months For Their Care

American purebred dog owners increased their spending to \$30,286-\$92.50 in order to feed, kennel and give stamp modification to their pets during the first half of 1935, according to a survey released in New York by the American Kennel Club, governing body of the sport of dogs in the United States.

This is an increase of some 23 per cent over the \$24,535,737.50 spent by dog owners during the first six months of 1935.

Boxed Apples From R.C.

The output of boxed apples from British Columbia has yet been offered to nature lovers at Shaw's Garden, represents the last bit of vegetation the Byrd expedition saw as they approached the South Pole. The rugged, moss-like growth was observed by the expedition as it eked out a precarious existence on the northern exposure of mountainous rocks within 200 miles of the pole itself.

Gentleman—"Can you go into any business more profitable than begging?"

Beggar—"Well, sir, I'd like to open a bank, but I haven't got the tools."

## Advertising Pays:

When The Advertiser Has Something  
Worth Selling

If a business man has a suit of clothes or a pair of shoes or some other article tucked away on a shelf, how can he expect to sell it if the people do not know it is there?

City merchants have long since learned the value of consistent and persistent advertising, and they reach out to the country towns for rural trade.

The small-town merchant could just as well hold that trade—if he would do even a fraction of the advertising city firms are constantly placing before the consuming public.

Recovery will come to those who seek it. It will pass by those who make no effort to achieve it.

## Local News

Born to Mr. and Mrs. Sam Gillis on Aug. 22, a daughter, Elizabeth Moores, nurse-in-training, Calgary general hospital, is home on holidays.

Miss Alma Hedberg of the International office staff spent two weeks holidays at Waterton.

Challis Escott returned this week from British Columbia, where he has been working for most of the year.

Mr. and Mrs. M. Joyce and Mr. and Mrs. J. Joyce left for two weeks holiday in Vancouver on Saturday.

Albert Krywolt, former proprietor of Frank hotel, and now owner of a mine at Burnis, was visiting Joe Lipovski on Monday.

Mr. and Mrs. Jack Richards and Di Randall left on Friday morning for a month's tour of the Pacific coast. They expect to go as far south as Frisco.

Harry Harris, faithful orderly at Coleman hospital, is on his annual vacation, and during his absence Mike Huculak is temporary caretaker and janitor.

Lieut. Pierce of the Salvation Army, for whom a farewell service was held at the Army hall last Sunday, has been transferred to Wetaskiwin.

About a dozen members of the Rod and Gun club went to Waterton on Saturday afternoon, to spend Sunday in a club competition.

Mr. and Mrs. A. S. McLintock left on Saturday for two weeks holiday at Vancouver. Mr. McLintock will attend a convention of amateur radio operators while in the city.

Mr. and Mrs. James Ford and Lawrence returned on Saturday from a trip to Coeur D'Alene, returning via Logan Pass and Waterton. British Columbia highways are terrible, Mr. Ford stated.

"Thirty Years Ago" item in Cranbrook Courier states: "There was great rejoicing in Sandpoint this week over the arrival of the Spokane-International railway, thus giving the city three railroads."

Mr. and Mrs. Sam Moores and Mr. and Mrs. William White returned Sunday from a month's holiday at the Coast and with relatives at Creston. Fine weather, and only one shower of rain, marked an enjoyable holiday, stated Mr. Moores.

Mr. and Mrs. George Brown, of Three Bridges, Sussex, Eng., left on Tuesday for London, Ont., after visiting with their son, George A. Brown and Mrs. Brown for three months. They will spend some weeks in Ontario, visiting relatives, and embark for England early in October. During their visit they have enjoyed a stay in almost every western province, including a holiday in Vancouver, which city Mr. Brown thinks is the finest in Canada for business and pleasure combined. He enjoyed his stay in Coleman, and travelled most of the nearby mountain trails.

## Local News

Mr. and Mrs. John Jackson, and Jean and Margaret, will leave on Sunday for two weeks holiday.

Service on Sunday at St. Alban's will be at 7 p.m. Sunday school at 2.30 p.m. Rev. and Mrs. A. S. Partington returned on Tuesday from a month's vacation at Vancouver.

Mrs. Montagu Wilson, of Arrow Lakes, B.C., is visiting her son, Mr. Sidney White and Mrs. White at Blairmore, and also old friends in Coleman. Mrs. Wilson is another of The Journal's valued subscribers, having taken it since it was established in 1921.

The Journal acknowledges renewal subscription from Mr. and Mrs. Montagu Wilson of Arrow Lakes, B.C. for many years regular subscribers. Many local subscribers also have renewed in response to our request of a week ago, and their prompt payment is appreciated.

Before Judge A. M. McDonald in district court Wednesday, the case of Antonio Ambrosi, plaintiff, vs. Thomas France, defendant, was heard. The cause of the action was to recover money loaned to defendant. Judgment was given for the plaintiff, with interest and costs. R. F. Barnes, barrister, counsel for plaintiff.

Mr. and Mrs. Tom Taylor, of Kaslo, B.C., Mr. and Mrs. Frank Abbey, of Mirror Lake, B.C., and Mr. and Mrs. James Derbyshire, of Crawford Bay, B.C., were visitors with Mr. and Mrs. Jack Derbyshire this week-end. It is 27 years since Mrs. Derbyshire left here, this being her first visit in that time.

Several arrests were made on Saturday evening by Constable Antle, and court will likely be held on Saturday morning with Magistrate Gresham presiding. Two young men engaged in a free-for-all, a man was found drinking liquor in a cafe and several youths will be summoned for disorderly conduct on Main street. The police are determined to curb these nuisances on pay-nights.

Unemployed representatives from Calgary, Edmonton, Lethbridge, Medicine Hat, Drumheller and other points will interview Premier Aberhart at the parliament buildings, Aug. 31, in connection with a constructive works program and relief matters. A mass meeting will be held in Edmonton on August 30. The A. F. U. will organize resistance to any attempt to cut relief in Calgary, it was decided at the executive meeting held on August 24.

Mr. and Mrs. A. Fyfe returned on Saturday from several weeks holiday in Vancouver and Victoria. Vancouver was very lively over the Jubilee celebrations, stated Mr. Fyfe, though the people there raised a vociferous objection against paying admission fee of 25c to Stanley Park, which had been fenced in for the celebration. Public opinion was so strong, however, that the city had to resume free admission. Though it has attracted many people the celebration will incur serious financial loss, which the city will have to absorb.

At the beginning of the school holidays, Armand Celli, The Journal delivery boy in West Coleman, packed his knapsack and departed for fields unknown. Soon after he was heard from on the west coast, and apparently was heading for California or some other warmer clime. His parents have heard from him occasionally, and he is out seeking fame, fortune and adventure. Just when he will return is unknown. He may spring a surprise and return as suddenly as he departed, without any warning. He was an enterprising boy and his sunny smile should help him along over the rough spots.

## FIFTEEN YEARS AGO

The Journal, September 1, 1921

The teachers of our public and high school will be arriving soon to take up their duties. This year the staff has been increased to fourteen. With such a gathering of intellectuals in our midst, the tone of our town should be enhanced. We welcome them all and wish them much success.

Coleman barely escaped having a fatal accident on Monday evening. Mr. Riddell (junior) left his car facing the track thinking all was well, but unfortunately the car moved of its own accord and before it was noticed the two front wheels were on the railway track and the car in imminent danger of the passenger train then due. A number of men got busy and tried their best to get the machine back on the platform, but the train came in sight as they were about to succeed and dashing in caught the car and made it a total wreck. Happily no one was hurt.

## "You Cannot Get Something For Nothing"

At Cardston recently Apostle Melvin J. Ballard stated to the Rotary club: "We tried the script idea in Salt Lake city during the time the banks were closed. It worked alright until it pooled up in a few department stores and there it came to a halt. The Z. C. M. L. alone had \$60,000 worth and they didn't know what to with it."

Remember that wealth must come out of the soil by the sweat and the blood and the bone of the worker. And remember that you cannot get something for nothing.

## LOCAL AND GENERAL

Mamie Hamilton of Blairmore is visiting Joanna Flynn.

Mrs. T. Flynn spent a few days at Crows Nest Lake, the guest of Mrs. G. R. Neil.

Worth-while customers look for worth-while buying opportunities in this paper. It gives THE BEST impressions and THE BEST returns.

W. A. Vaughan, the finest looking travelling salesman in the Crows Nest Pass, and W. J. (Enterprise) Bartlett, who has the distinction of being the tallest editor in all Canada, were visitors in Coleman. With becoming modesty they said they didn't want their names in the paper, but as they are entitled to as much publicity as all other notables, including Sir Edward Beatty and the Lord Mayor of London, why—here they are!

FLOWERS: Bouquets, wreaths, cut flowers for any occasion.—Bowen's Furniture Store.
